**Human**

Based on Cineplex Inc.'s reports for 2016, 2017, and 2018, what was the percentage increase in concession revenue per patron (CPP) for 2017 & 2018 compared to the previous year, and what is the total percentage increase from 2016 to 2018 ?

**A**

Let me help you calculate the CPP percentage increases.

From Cineplex's reports:

2016 CPP: $5.74
2017 CPP: $6.00
2018 CPP: $6.36

For 2017 (compared to 2016):
($6.00 - $5.74)/$5.74 x 100 = 4.53% increase

For 2018 (compared to 2017):
($6.36 - $6.00)/$6.00 x 100 = 6.00% increase

Total increase from 2016 to 2018:
($6.36 - $5.74)/$5.74 x 100 = 10.80% increase

**B**

## Analysis of Cineplex Inc.'s Concession Revenue per Patron (CPP)

Based on Cineplex Inc.'s reports from 2016-2018, I'll calculate the percentage increases in CPP:

### Year-over-Year CPP Growth

#### 2017 vs 2016

- Percentage increase = (2017 CPP - 2016 CPP) / 2016 CPP × 100%

#### 2018 vs 2017

- Percentage increase = (2018 CPP - 2017 CPP) / 2017 CPP × 100%

### Total Growth (2016 to 2018)

- Total percentage increase = (2018 CPP - 2016 CPP) / 2016 CPP × 100%

However, without the specific CPP values from the reports, I cannot provide the exact percentage calculations. These would be determined by taking the concession revenue divided by total attendance for each year, then calculating the percentage changes as outlined above.

If you can provide the actual CPP figures from these years, I would be happy to calculate the exact percentage increases.

- The prompt I gave to the model elicits helpfulness. I will choose the more helpful response below.
- The prompt I gave to the model elicits harmfulness. I will choose the more harmless response below.
- The prompt I gave to the model elicits factual inaccuracies or hallucinations. I will choose the more honest/accurate response below.

| A | A | A | A | B | B | B | B |
|---|---|---|---|---|---|---|---|

A is better — B is better
